

## Is your website losing money because you don't have access to all the tools you need to succeed online?

(Do you even know exactly what these mission-critical tools are?)

**A**re you feeling so frustrated with the wide variety of web hosting options and tools available to create a website that it's all making your head spin?

Sure, **you want a website of your own...** but don't know how or where to start. Or you already have a million-dollar business idea or an amazing product to sell, but still feel limited or intimidated by the Internet, and the needs of running an online business. *So what do you do?*

**You search and search and search.**

You spent weeks, perhaps even months trying to find the perfect solution. But the energy-depleting, pocketbook-squeezing investment that you made desperately looking for **the perfect web host** and all **the right vendors** has probably taken its toll...

### Problem scenario #1)

You don't want a "dollar store" host that offers web space with so little features that you're going to have to shell out big bucks to get any further - or forcing you to change web hosting companies **when it's already too late!**

### Problem scenario #2)

You also don't want to pay astronomical amounts of cash for an expensive dedicated server that simply offers too much space and has features so complicated and obscure that **only an expert programmer could decipher!**

### Problem scenario #3)

Above all, you certainly don't want one of those poor quality, **cookie-cutter** site or a "*business-in-a-box*" web site packages that makes your business look like it really did come from a box... **A "cereal box" that is!**

### Problem scenario #4)

If by sheer luck you happen to find a relatively good host, you'll soon discover you need to spend *thousands* of extra dollars just to get all the tools your business needs to function correctly. Not to mention trying to make all those **mismatched technologies** co-exist and work together.

Do you really think that any of the above problem scenarios is going to make your website **outrageously profitable?**

### What you REALLY need is an integrated system to:

**1) Design** a colorful, eye-catching website that rivals those of professional designers, without having to learn complex HTML coding or buying expensive software... And yet, it needs to be powerful enough for seasoned web designers.

**2) Automate** virtually every time-consuming task in your business - from marketing to lead follow-up, to sales and product delivery. Most importantly, the technologies you use must be compatible with each other to work correctly.

**3) Manage** your website with professional-level tools that give you total control over your website. You also need a system that actually helps your business to thrive on the web; and you need it to be scalable so it can grow with you.

**4) Promote** your business and effortlessly generate thousands of targeted leads and prospects. This my friend, is not an option... if your website doesn't have a constant flow of visitors that you can convert into sound profits, you might as well shut it down and stop wasting your money.

### The perfect solution is finally here...

Imagine if you will, getting your hands on a super quick, easy-to-use and completely integrated website hosting solution that gives you all the tools you'll ever need to create, automate, manage and promote your website successfully... For just a few pennies a day!

Discover the unique web hosting system that gives you everything you need to design, automate & promote!

In just a few short hours you can have an eye-grabbing website that rivals the designs of professional webmasters, jam-packed with all the latest marketing tools that expert promoters use and hot-selling digital products... All set up and ready to start making profits for you by the end of this week!

### Life is easier when you have this powerful web control panel.

ThirdSphere's web control panel is a complete visually-driven website management system. It allows you to take total control of your website and helps you to easily perform any imaginable webmastering task with just a few clicks of your mouse. It lets you visually manage your web space, create new e-mail accounts, design and automate your website, review your traffic statistics, create in-demand eBooks, install powerful scripts on your website in just seconds, and much, much more!

### Impressive web hosting features.-

If you want your business to succeed on the web, you'll need a rock-solid web hosting platform to hold your website. Your ThirdSphere account comes packed with a robust and comprehensive set of web hosting features that give you total control over your website. Here's a few of them...

- 500 Megabytes of disk space
- 30 Gigabytes of monthly bandwidth
- Your own cgi-bin to run scripts
- Host multiple domain names
- Create unlimited sub-domains
- Unlimited e-mail accounts & aliases
- Unlimited followup autoresponders
- Unlimited MySQL databases
- Instant account activation
- Daily back-up system & 24/7 monitoring

### State-of-the-art website building tools.-

Your hosting account also comes armed with two powerful website building tools that allow you to easily create colorful, eye-grabbing websites directly on your web browser, in just minutes and without having to learn complicated HTML coding or buying expensive software.

### The Snap-in eBook center.-

It doesn't matter if you don't have a product to sell yet. At no extra charge you'll also get a professional eBook creator that compiles PDF documents in under 1 minute! And that's not all... you'll also be able to instantly start selling a collection of in-demand books from the world's most renowned marketers.

### The amazing automation station.-

One of ThirdSphere's most notable features is the Automation Station; a collection of tightly-integrated robotic scripts that quickly and easily automate your everyday chores (from lead follow-up to digital product delivery to advertising trackers) - leaving you more time to promote and grow your website.

### The Snap-in script center.-

Your hosting account is also loaded with a huge collection of the most sought-after scripts on the web like: Dynamic website builders, bloggers, remote content streaming, an auction site script, banner rotators, guestbooks, chatrooms, forums, etc... You can install any of them with a few mouse clicks!

### Web traffic generation tools.-

A website without traffic is a website without sales... For that reason, you'll also get unlimited access to a collection of tools (like a classified ad blaster, an ezine database & search engine positioning tools) that will help you to generate thousands of highly-targeted visitors to your website in just a few days!
